- D. 1" Ball w/ 3/8" Thread
- E. Double Socket Arm For 1" Ball
- F. Two Bolts
- G. Two Nuts
- H. Fiber Washer

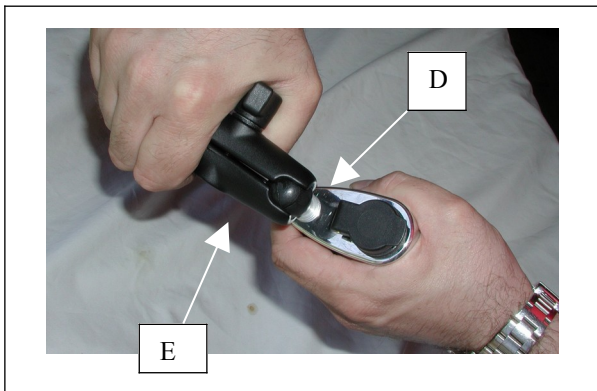

**Introduction:**

Made in USA

This easy to install, high quality, kit provides a convenient way to mount and power a radar detector on your motorcycle.

**Installation Instructions:**

**STEP #1** – Remove the mounting hole cover on the Powerbar and install the ball into the 3/8" hole [D]. Using the double socket arm [E], tighten the 1" ball into the Powerbar.

**STEP #2** – Attach the diamond base ball mount [C] to the back of the radar platform using the supplied screws & nuts [F & G].

**STEP #3** – Loosen the arm enough to slip over both balls [C & D] and position the radar detector platform.

**STEP #4** – Plug in the supplied cable [A] into the Powerlet socket and the other end into the radar detector.

**\*The Radar Detector** is not supplied with this mounting kit.
